- Flutter
- Dart
- React Native
- App Deployment

Specialized Tools
- Python(WebScraping/Automation)
- Stripe Payments
- Rest APIs
- Git
- Postman

LANGUAGE
- English
- Urdu
- Hindi

PROFILE

I am a Full-Stack Developer with 3+ years of experience. I build web and mobile apps using MERN and Flutter. I have worked with many international clients to turn their ideas into working products. I always focus on making sure my apps are fast, secure, and easy for everyone to use.

WORK EXPERIENCE

Freelance Full-Stack Developer　　Jan 2023 – Present
- I finished more than 10 projects for global clients, handling everything from the first line of code to the final launch.
- I made apps load 35% faster by using better caching and image management.
- I added Stripe payment systems so my clients could take payments from anywhere in the world.
- I used error-tracking tools to make sure the apps stayed up and running without any big issues.

Data Systems Engineer (Intern)　　Jun 2024 – Jan 2026
- I used Python to scrape over 10,000 records every week from different websites.
- I automated the data collection process, which saved the team about 60% of their manual work time.
- I helped clean up large amounts of data to make it easier for the company to analyze.

PROJECTS

Social Vibing (Social Networking App)　　Jan2026-present
- Tech: React Native, React.js, Firebase
- Built a cross-platform app and web version with real-time chat and news feed.
- Used Firebase for backend, data storage, and instant push notifications.

ScholarIQ (Scholarship Management System)　　OCT2025-present
- Tech: React, TypeScript, Python, SQLite
- Built a portal to help students find scholarships using smart search filters.
- Used Python for backend logic and SQLite to manage student/scholarship data.

TourEase (Travel Planning Platform)　　Nov2025-Dec
- Tech: Flutter, Firebase
- Built a mobile app for destination search, trip planning, and bookings.
- Used Firebase for the backend and integrated real-time weather APIs.
